

| PROJECT PROFILE |

## 95 Edward Street, Brisbane

### The Story

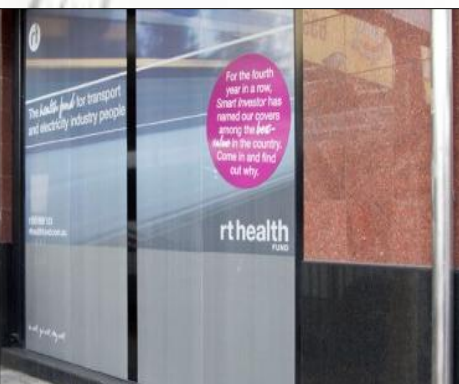

Signature Project Management was engaged by RT Health to prepare a due diligence report on the potential of three different properties for the use of a health insurance providers premises. The client based their purchasing decision on these reports.

The brief included the refurbishment and upgrade to the existing heritage-listed building and comply with the current building codes of Australia. We also had to ensure the property is sympathetic to the heritage listing which made DA more challenging.

As the project included adding in optical and dental to the premises, it changed the classification of the building, which meant ensuring we met all the Council requirements of this new classification.

### Creating The Vision

Our teams of highly skilled, dedicated professionals bring the broadest range of experience and expertise to the table. Together, we aim to deliver the highest standards of quality and service across all stages - from planning, to design and delivery. By developing and streamlining systems that monitor project quality and WHS throughout the entire process, we can provide significant savings of time, money and stress. At the same time, these systems contribute to greater efficiency, effectiveness and success of every project.
